Health Plan of San Joaquin

HIPAA Transaction Standard Companion Guide

Refers to the Implementation Guides Based on ASC X12 version 005010

CORE v5010 Companion Guide

September 2015
Disclosure Statement

Health Plan of San Joaquin is accepting X12N 270/271 Health Care Eligibility Request and Response, as mandated by the Health Insurance Portability and Accountability Act of 1996 (HIPAA).

Type 3 and Errata (also The X12N 270/271 version of the 5010 Standards for Electronic Data Interchange Technical Report referred to as Implementation Guides) for the Health Care Eligibility Request and Response Transaction has been established for eligibility status inquiry and response compliance. This document has been prepared to serve as a Health Plan of San Joaquin’s specific companion guide to the 270/271 Transaction Sets. This document supplements but does not contradict any requirements in the 270/271 Technical Report, Type 3. The primary focus of the document is to clarify specific segments and data elements that should be submitted to Health Plan of San Joaquin on the 270/271 Health Care Eligibility Status Request and Response Transaction. This document will be subject to revisions as new versions of the 270/271 Transaction Set Technical Reports are released. This document has been designed to aid both the technical and business areas.
Preface

This Companion Guide to the v5010 ASC X12N Implementation Guides and associated errata adopted under HIPAA clarifies and specifies the data content when exchanging electronically with Health Plan of San Joaquin. Transmissions based on this companion guide, used in tandem with the v5010 ASC X12N Implementation Guides, are compliant with both ASC X12 syntax and those guides. This Companion Guide is intended to convey information that is within the framework of the ASC X12N Implementation Guides adopted for use under HIPAA. The Companion Guide is not intended to convey information that in any way exceeds the requirements or usages of data expressed in the Implementation Guides.

1 INTRODUCTION

Under the Administrative Simplification provisions of the Health Insurance Portability and Accountability Act (HIPAA) of 1996, the Secretary of the Department of Health and Human Services (HHS) is directed to adopt standards to support the electronic exchange of administrative and financial health care transactions. The purpose of the Administrative Simplification portion of HIPAA is to enable health information to be exchanged electronically and to adopt standards for those transactions.

For questions relating to the Health Plan of San Joaquin’s 270/271 Health Care Eligibility Status Request and Response Transaction or testing, please contact (209) 942-6320.

Health Plan of San Joaquin’s billing guidelines are not included in this document. Please refer to our website at http://www.hpsj.com/providers/ for these guidelines, or contact Provider Relations at (209) 942-6340.

1.1 SCOPE

This section specifies the appropriate and recommended use of the Companion Guide.

This companion guide is intended for Health Plan of San Joaquin’s Trading Partners interested in exchanging HIPAA compliant X12 transactions with Health Plan of San Joaquin. It is intended to be used in conjunction with X12N Implementation Guides and is not intended to contradict or exceed X12 standards. It is not intended to be used to clarify the CORE rules. It contains information about specific Health Plan of San Joaquin requirements for processing following X12N Implementation Guides:

- 005010X279A1, Health Care Eligibility Benefit Inquiry and Response (270/271)

All instructions in this document are written using information known at the time of publication and are subject to change.

1.2 OVERVIEW

The Health Insurance Portability and Accountability Act–Administration Simplification (HIPAAAS) requires Health Plan of San Joaquin and all other covered entities to comply with the electronic data interchange standards for health care as established by the Secretary of Health and Human Services.

This guide is designed to help those responsible for testing and setting up electronic eligibility status transactions. Specifically, it documents and clarifies when situational data elements and segments must be used for reporting and identifies codes and data elements that do not apply to Health Plan of San Joaquin. This guide supplements (but does not contradict) requirements in the ASC X12N 270/271 (version 005010X279A1) implementation. This information should be given to the provider’s business area to ensure that eligibility status responses are interpreted correctly.

1.3 REFERENCES

This section specifies additional documents useful for the read. For example, the X12N Implementation Guides adopted under HIPAA that this document is a companion to.

2 GETTING STARTED

2.1 WORKING WITH HEALTH PLAN OF SAN JOAQUIN

For questions relating to the Health Plan of San Joaquin’s 270/271 Health Care Eligibility Status Request and Response Transaction, or testing contact the Provider Relations department at (209) 942-6340.

2.2 TRADING PARTNER REGISTRATION

Providers will retrieve the enrollment form from the website listed below. Providers will submit the completed form to HPSJ via website listed below.

All forms and instructions will be located on this page:
http://www.emdeon.com/epayment/enrollment/

3 TESTING WITH THE PAYER

After the submitter setup is complete, the submitter can send eligibility status transactions to the test environment. Health Plan of San Joaquin notifies the provider after the successful completion of testing and prepares the provider for production status.

- During the testing process, Health Plan of San Joaquin examines submitted test transactions for required elements, and also ensures that the submitter gets a response during the testing mode.
- When the submitter is ready to send ANSI 270/271 transactions to a production mailbox, they must notify Health Plan of San Joaquin Provider Relations. Provider Relations then moves the submitter to the production environment.
- The submitter’s mailbox name remains the same when moving from test to production. Changing passwords is optional upon submitter's request to the Provider Relations Team.

4 CONNECTIVITY WITH THE PAYER/COMMUNICATIONS

4.1 PROCESS FLOWS

4.1.1 Real-time

- The user application submits an SOAP request at https://or.edifecs.com/mt1sp800 and MIME request at https://or.edifecs.com/mt1mp800
- Eligibility status system authenticates the user
- If the user is successfully authorized, the following files will be issued within 20 seconds:
  - TA1 (if problem with the ISA/IEA segments exist)
  - 999 Reject (if problem occurs within the subsequent loops and segments)
  - 271 Eligibility Response

4.1.2 Batch

- The user application submits an SOAP request at https://or.edifecs.com/mt1sp900 and MIME request at https://or.edifecs.com/mt1mp900
Eligibility status system authenticates the user
If the user is successfully authorized, one of the following will be generated back to the user:

- TA1 available within one hour, if there is a problem with the ISA or IEA segments
- 999 Reject available within one hour, if there is a problem with the segments occurring between the ISA and IEA.
- 999 Acceptance response will be available within one hour.
- The 271 transaction(s) will be available the following day (no later than 7:00 am)

4.1.3 Structure Requirements
Real-time 270 requests are limited to one inquiry, per patient, per transaction.
Batch 270 requests are limited to 99 inquiries per ST-SE transaction.

4.1.4 Response Times
A response (TA1, 999 reject or 271) to real-time inquiries will be provided within 20 seconds. A response to the batch inquiry will be provided by 7 a.m. (ET) the following day. Batch requests submitted after 9 p.m. (ET) will be available by 7 a.m. (ET) two days following submission.

4.2 RE-TRANSMISSION PROCEDURE
If the HTTP post reply message is not received within the 60-second response period, the user’s CORE compliant system should send a duplicate transaction no sooner than 90 seconds after the original attempt was sent.
If no response is received after the second attempt, the user’s CORE compliant system should submit no more than five duplicate transactions within the next 15 minutes. If the additional attempts result in the same timeout termination, the user’s CORE compliant system should notify the user to contact the health plan or information source directly to determine if system availability problems exist or if there are known Internet traffic constraints causing the delay.

4.3 COMMUNICATION PROTOCOL SPECIFICATIONS
The following is a list of technical standards and versions for the SOAP envelope and Eligibility status payload:

- HTTP Version 1.1
- CSOAP Version 1.2
- SSL Version 3
- Health Care Eligibility Status Request and Response Version 005010X279A1
- CAQH SOAP (Health Plan of San Joaquin supports the use of HTTP SOAP + WSDL envelope standards as identified in CAQH CORE Phase I/II Connectivity standards http://www.caqh.org/pdf/CLEAN5010/250-v5010.pdf )

The following is a list of technical standards and versions for the HTTP MIME multipart envelope and eligibility status payload:

- HTTP Version 1.1
- SSL Version 3.0
- MIME Version 1.0
- Health Care Eligibility Status Request and Response Version 005010X279A1
- CAQH MIME (Health Plan of San Joaquin supports the use of HTTP MIME Multipart existing envelope standards and has implemented the HTTP MIME Multipart envelope standards as identified in CAQH CORE Phase I/II Connectivity standards.)

7 PAYER SPECIFIC BUSINESS RULES AND LIMITATIONS

Health Plan of San Joaquin uses real time processing for its EDI transactions to provide immediate responses to its submitters. In real time, the submitter transmits a request transaction to Health Plan of San Joaquin and then remains connected while Health Plan of San Joaquin processes the transaction and responds to the submitter. Health Plan of San Joaquin accepts the 270/271 transactions as a "read only" transaction and will not use any data coming in on the 270 transaction to update its internal systems. Additionally, where stated in the ASC X12N ANSI 270/271 Health Care Eligibility Inquiry and Response Transaction Set Implementation Guide, Health Plan of San Joaquin will respond with its source data from internal systems, including but not limited to such data as Subscriber Name information, Member Id and DOB.

SUPPORTED FUNCTIONALITY

- Health Plan of San Joaquin accepts the 270/271 transactions as a "read only" transaction and does not use any data coming in on the 270 transaction to update its internal systems.
- To provide immediate response to submitters, Health Plan of San Joaquin uses real time processing for its EDI transactions.
SUBSCRIBER AND MEMBER SEARCHES

To uniquely identify a member, a 270 transaction must include the member’s Health Plan of San Joaquin’s Identification Number, the information source’s Identification Number, member’s last name and date of birth and service type code.

- For the best response time, Health Plan of San Joaquin recommends that the 270 transaction set be programmed to a single record. This consists of a one-to-one ratio in a single loop structure: one information receiver, one provider, one subscriber and request service type code(s).
- If the 270 transaction is not rejected, Health Plan of San Joaquin returns the 271 transaction with all of the Inquiry criteria information that was submitted in the 270 transaction.

8 ACKNOWLEDGEMENTS AND/OR REPORTS

8.1 999 – ACKNOWLEDGEMENT FOR HEALTH CARE INSURANCE

Health Plan of San Joaquin supports the Acknowledgement for Health Care Insurance (999). 999s are sent for real-time submissions of 270 transactions when error or discrepancy found at GS or transaction level. For Batch 270 transactions a 999 is sent always.

8.2 TA1 - INTERCHANGE ACKNOWLEDGEMENT REQUEST

Health Plan of San Joaquin supports the Interchange Acknowledgement Request (TA1) when any issues at ISA level.

8.3 REJECTION LOGIC/STATUS CODES

Health Plan of San Joaquin developed its rejection logic using HIPAA standard codes available on the Washington Publishing Company’s website (www.wpc-edi.com) to better communicate to providers the reason a transaction was rejected and what action to take to resolve the rejection.
9 TRADING PARTNER AGREEMENTS

This section contains general information concerning Trading Partner Agreements (TPA). An actual TPA may optionally be included in an appendix.

9.1 TRADING PARTNERS

An EDI Trading Partner is defined as any Health Plan of San Joaquin customer (provider, billing service, software vendor, employer group, financial institution, etc.) that transmits to, or receives electronic data from Health Plan of San Joaquin. Health Plan of San Joaquin uses request through Provider services to register new partners and agreement/set-up forms to process electronic transactions.

10 TRANSACTION SPECIFIC INFORMATION

The following table specifies the segments and suggested use of them in the transmission:
