NEW Speaker Bureau – A Public Service of Health Plan of San Joaquin

Due to increasing demands from local, regional and national groups for HPSJ's healthcare professionals and industry experts to participate in conferences, workshops and meetings, we have created a Speakers Bureau to better accommodate each of these requests.

In addition to participation by HPSJ staff who are authorities ranging from medicine to public policy, business systems to the intricacies of Medicaid managed care, Health Plan of San Joaquin is fortunate to include several members of HPSJ's governing Health Commission. As many know, one of HPSJ's greatest strengths is the Commission's blend of public servants, community representatives, and local physicians. Together, these HPSJ speakers are helping audiences stay current on the complex healthcare landscape. Presentations are available in English and Spanish.

Here are some samples from our menu of Speakers Bureau topics:

- Opioids Crisis – A rising local collaboration is providing a way forward
- Oral Health, An HPSJ + Provider Network Initiative – Our kids are precious, so are their teeth
- Telehealth – How HPSJ is partnering to expand support for local providers & practices – all to better serve

our members and community

- Health Care Workforce – Central Valley Challenges, Innovative Opportunities.
- Like patients, health plans need to know their numbers – How we're using data to improve care for HPSJ members
- Palliative Care Options – A pioneering HPSJ collaboration is helping local medical teams comfort some of their most critically ill patients
- HPSJ Multiplier Effect – Viable local economy

For more about the HPSJ Speakers Bureau, a complete list of topics – and to learn how to request a speaker for a community group or professional association – please go to <https://www.hpsj.com/speakers>.

About Health Plan of San Joaquin HPSJ, a not-for-profit public health plan, has been serving members and the community since 1996. Located in the heart of California's multicultural Central Valley, HPSJ is the leading Medi-Cal managed care provider in San Joaquin and Stanislaus counties. HPSJ offers a broad network of providers and works closely with physicians to develop programs and services to ensure quality health care for almost 350,000 members who are mostly working families and children, as well as seniors and persons with disabilities.
