LONG TERM CARE (LTC) OVERVIEW

Christina Villar, Provider Services Representative II

Purpose

The purpose of the following presentation is to support the efforts to increase correct processing and payment with the first claim submission and guide you through the claim submission process for the various Long Term Care services.

Background

The Medi-Cal program provides benefits through both fee-for-service (FFS) and managed care plans (MCP). In efforts to standardize, help ensure consistency and reduce complexity across the state and reduce county-to-county differences, the Department of Health Care Services (DHCS) is implementing Benefit Standardization.

Effective January 1, 2023, HPSJ must authorized and cover medically necessary skilled nursing and custodial services provided in Skilled Nursing Facilities (SNF), meaning members who are admitted into a SNF will remain enrolled in HPSJ instead of being disenrolled.

Effective January 1, 2024, the remaining LTC members receiving the LTC benefit in a Subacute or Intermediate Care Facility (ICF) must be enrolled in an MCP.

Definitions: Type of Care

Long Term Care (LTC) involves a variety of services designed to meet a person's health or personal care needs during a short or long period of time.

Skilled Nursing Care is nursing and therapy care that can only be safely and effectively performed by, or under the supervision of, professionals or technical personnel. It is health care given when skilled nursing or therapy is needed to treat, manage, and observe a patient's condition, and evaluate their care.

Subacute Care is a level of care that is defined as comprehensive inpatient cared designed for someone who has an acute illness, injury or exacerbation of a disease process.

Intermediate Care provides 24-hour personal care, habilitation, developmental, and supportive health care services to developmentally disabled persons. There are three levels of care, ICF/DD, ICF/DD-H, and ICF/DD-N.

Definitions: Billing Terminology

Type of Bill Codes: Identifies the type of bill being submitted to a payer. Type of bill codes are four-digit alphanumeric codes that specify different pieces of information on claim form UB-04.

Frequency Codes: The third digit of the type of bill submitted on an institutional (UB04) claim to indicate the sequence of a claim in the patient's current episode of care.

Revenue Codes: Identifies specific accommodations, ancillary services, or unique billing calculations, or arrangements relevant to the claim.

Value Code: Identifies special circumstances that may affect processing of the claim

Accommodation Code: Identifies the type of accommodation utilized by the patient during the billing period.

Share of Cost: Some HPSJ members must pay, or agree to pay, a monthly dollar amount toward their medical expenses. This dollar amount is called Share of Cost (SOC). The Medi-Cal member's SOC is similar to a private insurance plan's out-of-pocket deductible.
